SUMMARY

Information Technology graduate from Yogyakarta State University, specializing in end-to-end UI/UX design, user research, and front-end implementation. Experienced in transforming complex workflows into intuitive web platforms through cross-functional collaboration. Passionate about crafting accessible, high-impact digital products that solve real-world problems through innovative design.

EDUCATION

Yogyakarta State University

Information Technology Major

2021 - 2025

- **GPA: 3.64/4.00**
- Relevant Subjects: Programming, Web Applications, Web Design, Web Programming, Project Management Software, Visual Communication Design, Human Computer Interaction, Interactive Multimedia

WORK EXPERIENCES

PT Nusantara Regas

IT Intern

February 2024 - June 2024

- Designed 100+ wireframes into high-fidelity interactive prototypes, digitally transforming the company's internal reporting system.
- Led UI/UX migration of legacy Excel workflows into a digital platform, boosting offshore reporting efficiency and data organization.
- Designed intuitive and functional interfaces tailored for the daily operations of offshore tugboat crews.
- Project Focus: Designed an internal web-based tugboat reporting system and analytics dashboard for maritime logistics and gas infrastructure data.

PROJECT EXPERIENCES

Registration System Website

UI/UX Redesign - Thesis

February 2025 - July 2025

- Redesigned the university registration system using Design Thinking, creating high-fidelity wireframes with Figma.
- Improved usability scores by 6% and user experience by over 50% through prototyping and user testing.
- Translated Figma prototypes into a responsive Bootstrap interface, validating design feasibility and front-end technical alignment.

Social Commerce Analytics Website

UI Design - Freelance

September 2025 - November 2025

- Architected a scalable design system using Figma, ensuring 100% consistency across data-heavy analytics dashboards.
- Led cross-functional collaboration and design handoffs, ensuring technical feasibility and pixel-perfect responsiveness across web environments.
- Synthesized complex e-commerce data into intuitive visualization modules, streamlining sales, influencer, and audience engagement tracking.

Company Profile Website

Fullstack Developer - Freelance

May 2026

- Engineered and deployed a responsive Laravel 12 company profile website, modernizing a traditional manufacturing business.
- Designed a dynamic product catalog with intuitive flows, streamlining roof tile browsing and accelerating digital inquiries.
- Optimized performance, security, and loading speeds using Laravel 12, ensuring cross-browser compatibility and responsive layouts.

ORGANIZATIONAL EXPERIENCES

Student Association of Electronics & Informatics Engineering

Expert Staff of Information Media Division

February 2023 - January 2024

- Managed cross-functional PDD operations and branding for all major programs as Project Coordinator.
- Increased yearly audience engagement by 10% through strategic social media coordination and digital account management.
- Spearheaded production of 20+ visual assets, ensuring 100% brand consistency through cross-departmental collaboration.
